The Child Appeal Scoring System (CASS) is a structured framework designed to assess the extent to which a product is likely to attract and engage children. In an environment where children are frequently exposed to a wide range of consumer products. It is increasingly important to evaluate not only the safety and compliance of these products but also their degree of child-directed appeal. Using the following score system, evaluate the product design for further risk analysis.

- 1(Low Appeal) – unlikely to engage children, mainly adult-focused.
- 2(Moderate Appeal) – contains some features that may attract children, but not intentionally child-directed.
- 3(High Appeal) – intentionally designed to be attractive to children.
- 4 (Very High Appeal) – strongly child-focused, with multiple overlapping features.

This scoring provides a clear benchmark for comparisons between products and across industries.

**Visual Appeal: Assess the product design between 0-3 on the following criteria to evaluate the designs appeal and targeted audience.**

Caterogry	Criteria	Score Range	Score Given
Visual Appeal	Colours (bright, saturated)	0-3	0
	Characters (cartoons, mascots)	0-3	0
	Design simplicity (bold shapes, fonts)	0-3	1

	Novelty/Whimsy (fantasy, humour)	0-3	0

Functional Design	Ease of Use	0-3	0
	Size & Ergonomics	0-3	0
	Durability & Safety	0-3	1

#### Child Appeal Score Indicator

0-15 = Low child appeal (primarily adult-focused product).

16-30 = Moderate child appeal (some child-friendly elements, but not primarily for kids).

31-45 = High child appeal (likely designed with children in mind).

46-57 = Very high child appeal (strongly targeted to children).

**Overall Score : 2**

I confirm that the assessment conducted under the Child Appeal Scoring System (CASS) has been completed to the best of my knowledge and ability. The scores recorded in this assessment are a true and accurate reflection of the product, service, or communication reviewed at the time of evaluation. The scoring has been carried out using the standardised CASS framework, with due care, impartiality, and adherence to the defined criteria. No material information has been knowingly omitted or misrepresented in the completion of this assessment. The conclusions reached are based on the evidence available and are intended to provide a transparent and consistent measure of child-directed appeal. This document may be relied upon for internal review, regulatory compliance, or external reporting purposes, subject to the limitations of the CASS methodology.
