### **Manufacturing**

It is with intention that Something Different Wholesale source and use manufacturers that follow Good Manufacturing Practises ensuring cleanliness, effective documentation of procedures and processes and that staff received adequate and in-depth training of procedures.

Prior to manufacturing, collection methods for botanical agents should be in

accordance with EUROPAM GACP-MAP Version 2022, particularly for the sale within Europe. Adhering to Good Agricultural and Wild Collection Practices for Medicinal and Aromatic Plants ensures responsible, legal and conscious collection of production materials. Using GACP-MAP falls within the remit of CITES, monitoring and/or prohibiting the use and sale of protected species. Something Different Wholesale are required to stay informed with up to date CITES legislation.

### **Packaging**

The packaging of Essential Oils is to be in accordance with **ISO/TS 210:2023**. Type III Tinted anti-actinic glass is the most advisable to inhibit any alteration to the organoleptic properties. Other materials may be considered reference and testing information can be found with the ISO Directive.

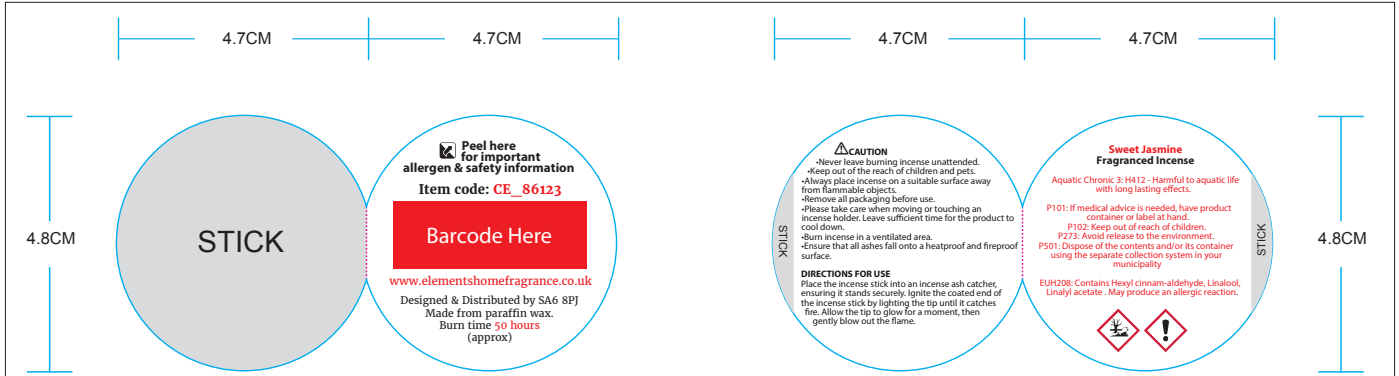

### **Labelling**

#### **CAUTION**

- Remove all packaging before burning.
- Keep out of reach of children and pets.
- Place on a flat, heat-resistant surface away from draughts and flammable objects.
- Keep wick trimmed to 1cm maximum to avoid excessive smoking.
- Never leave a burning candle unattended.
- If the flame becomes enlarged, do not continue burning.
- Extinguish candle with a candle snuffer and do not blow out.
- The candle holder may become hot during use. Allow to cool before touching.
- Do not attempt to move or touch when candles are lit.

- P101: If medical advice is needed, have product container or label at hand.  
P102: Keep out of reach of children.  
P273: Avoid release to the environment.  
P501: Dispose of the contents and/or its container using the separate collection system in your municipality. ← Precautionary statements
- EUH208: Contains Hexyl cinnam-aldehyde, Linalool, Linalyl acetate. May produce an allergic reaction. ← Supplementary information (Allergens)

Labels on essential oil products must be fit for purpose in accordance with **ISO/TS 211:2023**. To minimise damage or destruction, labels must be durable to withstand transport conditions. Labels are required to be affixed so that replacement is impossible upon the vessel and is rendered useless for repurposing. If possible, it is preferable that containers are marked, particularly if in large volume. Labelling must be clear and easily understandable. It must be visible and clearly legible. Labelling is required to be an appropriate and proportionate size for the container.

Labelling is required to have the following information as directed in **ISO/TS 211:2023**.

Directly inserted from ISO/TS211:2023

- a) the commercial name of the essential oil, botanical name (Latin name including the botanical authority) of the plant, and part of the plant from which it is obtained;
- b) the name or trade name and the address of the manufacturer or the distributor;
- c) the production process or any particular treatment: distillation, fractionation, expression, etc.;
- d) the percentage of the main constituent if the commercial value of the essential oil depends on it;
- e) the gross mass, tare, and net mass;
- f) the specific conditions of preservation (such as storage temperature), whether the essential oil has been decanted and the instructions for use;
- g) the batch number or the manufacturing date which provides all information about the origin and the method of production of the essential oil, in case of dispute or non-conformity with the specifications;
- h) the country of origin or the provenance;
- i) the symbols and the indications of hazards relating to the substance and the indications of the particular risks.
- j) the flash point for storage, if any, in a place reserved for flammable products.

To harmonise and standardise labelling of essential oils **ISO 4720:2018(en)**

Essential oils — Nomenclature, identifies the commercial and botanical name for each oil which is to be used in correspondence to **ISO/TS 211:2023** to ensure correct and identifiable labelling of solutions.

### List of parts

#### Testing

Something Different Wholesale prioritise the health and safety of the products distributed to their customers and end users. It is for this reason that samples of Essential Oil products undergo laboratory testing in accordance with **ISO 212:2007**. With this direction, each botanical element must undergo testing prior to the sale and distribution. Testing will ensure the safety of consumers in post market sales.

Each individual formulation must be tested, alongside changes to existing formulas that are intended for sale.

Testing that is required for cosmetic essential oil sale as of 2024 is as follows.

- I. Allergy Declarations
- II. Safety Data Sheet
- III. IFRA Certificates
