The Child Appeal Scoring System (CASS) is a structured framework designed to assess the extent to which a product is likely to attract and engage children. In an environment where children are frequently exposed to a wide range of consumer products. It is increasingly important to evaluate not only the safety and compliance of these products but also their degree of child-directed appeal. Using the following score system, evaluate the product design for further risk analysis.

- 1(Low Appeal) – unlikely to engage children, mainly adult-focused.
- 2(Moderate Appeal) – contains some features that may attract children, but not intentionally child-directed.
- 3(High Appeal) – intentionally designed to be attractive to children.
- 4 (Very High Appeal) – strongly child-focused, with multiple overlapping features.

This scoring provides a clear benchmark for comparisons between products and across industries.

16-30 = Moderate child appeal (some child-friendly elements, but not primarily for kids).

31-45 = High child appeal (likely designed with children in mind).

46-57 = Very high child appeal (strongly targeted to children).

Overall Score : 2

I confirm that the assessment conducted under the Child Appeal Scoring System (CASS) has been completed to the best of my knowledge and ability. The scores recorded in this assessment are a true and accurate reflection of the product, service, or communication reviewed at the time of evaluation.
